

Srustisri Panda

B.Tech CSE Student · Backend, AI/ML & Cloud Builder

Backend systems, collaborative AI, machine learning, cloud foundations, and expressive web interfaces.

Khordha, Odisha, India connect@srucodes.com github.com/sru-codes linkedin.com/in/srustisri-panda

PROFILE

B.Tech Computer Science and Engineering student at GIET University with a practical focus on backend development, AI/ML, cloud computing, and creative web experiences. Builds projects across Node.js, Python, React, Docker, and AWS, with interest in collaborative agent systems, telemetry automation, interpretable machine-learning pipelines, and polished interactive products.

FOCUS AREAS

Backend Systems

REST microservices, asynchronous APIs, Node.js, Express, Git-based workflows.

AI & Machine Learning

Collaborative agents, NLP, scikit-learn, regression, classification, evaluation.

Cloud & Interface

Docker, AWS EC2/S3, React, Tailwind CSS, GSAP, accessible interaction design.

EDUCATION

B.Tech, Computer Science & Engineering

GIET University, Odisha, India

Current student

SELECTED PROJECTS

ORCA — Marine Ecosystem Intelligence

SIH 2026 PS 26176

Designed an eight-agent collaborative system for marine telemetry, ecosystem-health reasoning, and contamination analysis. Reported ecosystem-reasoning accuracy: 96.2%.

JavaScript · Python · Node.js · Multi-Agent AI · Telemetry API

Galaxy Telemetry & Constellation Generator

Automation

Built a workflow that transforms GitHub activity into interactive SVG maps, project constellations, and retro terminal artifacts. Reports 150+ nodes, sub-450 ms generation, and 10,000+ tracked profile views.

Python · SVG · GitHub Actions · Canvas · Algorithms

Zyrix Dev — Digital Craft Studio

Interactive Web

Created a 3D interactive portfolio concept featuring animated cards, bot architecture studies, custom cursor mechanics, and motion-led navigation. Reported 120 FPS and a 14.2 kb asset bundle.

React · TypeScript · Tailwind CSS · GSAP · CSS 3D

Projects, Toolbox & Impact

Machine learning, creative technology, and continuous learning

MACHINE LEARNING PROJECTS

NLP Email Spam Classifier

98.7% precision

Developed an end-to-end supervised NLP pipeline with preprocessing, TF-IDF feature extraction, Naive Bayes classification, and transparent evaluation across 5,572 email records.

Python · Jupyter · scikit-learn · Pandas · NLP

Laptop Hardware Price Predictor

R² 0.89

Built an end-to-end regression workflow using exploratory analysis, categorical encoding, Random Forest, and Gradient Boosting across 12 hardware dimensions.

Python · Pandas · NumPy · scikit-learn · Matplotlib

TECHNICAL TOOLBOX

Languages	Python, JavaScript, HTML5, CSS3, C++
Backend	Node.js asynchronous APIs, Express REST microservices
Frontend	React with modern hooks, Tailwind CSS, GSAP, Lenis
AI / ML	Collaborative agents, scikit-learn, Naive Bayes, TF-IDF, regression
Cloud & Tools	Docker, AWS EC2 and S3, Git, GitHub Actions
Creative Tech	SVG, canvas, interactive telemetry, accessible motion systems

SELECTED IMPACT

2026

Smart India Hackathon finalist

8

ORCA collaborative agents

96.2%

Ecosystem-reasoning accuracy

100+

Bugs solved and debugged

1,200+

GitHub contributions

12+

Public repositories

LEARNING PHILOSOPHY

"I break code so I can learn how to fix it."
